7th International Conference on Public Mental Health and Neurosciences (ICPMN – 2020)

December 12-13, 2020
Online from Bengaluru, India.
THEME: Functional Genomics of Mind

With special workshop/session on Yoga, Machine Learning and NGS-Bioinformatics

We are pleased to announce our 7th International Conference on Public Mental Health and Neurosciences (ICPMN-2020) which will be a unique conference where we will connect Biological Function through Computational Genomics to the world of integrated medicine and therapeutics. Functional genomics is a field of molecular biology that attempts to describe gene (and protein) functions and interactions. The beneficiary of this program including students, medical doctors, plant breeders, pathologists, entrepreneurs in the areas of biology, medicine, agriculture, traditional medicine, environment and computational technologies. Big data is a promising in many research areas, but still it is computationally challenging and non-availability of experts to handle big-data with reduced speed and cost. The big data analytics technique is required to solve the problems in bioinformatics such as the storage of vast information generated by analyzing the big-data. Big data analytics can examine large data sets, analyze and correlate genomic and proteomic information.

Call for research/review/case studies abstracts from computer science, genetics, genomics, bioinformatics, big data, yogic science, philosophy, psychology and neuroscience.

Topics of the session may include, but not limited to, the following:
- Big data analysis in Bioinformatics
- Psychology and Public Mental Health
- Health/Life Sciences and Biotechnology
- Neuroscience
- Computational Biology and Neuroscience
- Ayur and Yog-Informatics
- Artificial Intelligence (IOT)
- Cultural* and applied psychology
- Spirituality* and yoga therapy
