

2nd International Conference on **Vaccines: Research and Development**

July 28-29, 2023 | Webinar (Online Meeting)

The present world health concern involving the emergence and rapid spread of a novel coronavirus (COVID-19) has prompted the entire scientific community to consider and rethink how it can help to fight this growing viral pandemic.

Sciencezo Planet is pleased to invite the virology, immunology and vaccine contributors across the globe on its "**2nd International Conference on Vaccines: Research and Development**" which is scheduled as Webinar during **July 28-29, 2023**.

Theme: Exploring next-generation vaccines: research, diagnostics and treatment that save lives.

The main focus and aim of the **Vaccines 2023** is to promote efficient and quality research and real-world impact in an atmosphere of true international cooperation between biological scientists and biotech researchers by bringing together virology experts, immunology and molecular biology expert's along with industrial CEO's and pharma heads to discuss the latest developments and innovations in the fields of Vaccines.

Several specific topics will include: Virology and Viral Diseases, Molecular Biology & **Immunology, Immuno-Genetics & Immune Tolerance, Influenza and Respiratory** Diseases, Protein Based Vaccines, and Veterinary Vaccines, **HIV/AIDS Vaccines** and Hepatitis Vaccines, **Antibodies: Engineering & Therapeutics**, Computational Biology, RNA/DNA Conflicts, **Emerging and Re-Emerging Infectious Diseases**, Vaccine Research & Development, Next-Generation Vaccine Delivery Technologies, Novel Approaches & New Trends in Vaccines Development and special aspects of Vaccines Safety and Efficacy. The **Vaccines 2023** is unique in bringing the Virology and Immunology fields together in the field of Vaccines and Viral diseases.

About Us

Sciencezo Planet is associated with vitalizing and refining the information about Science, Medical Science, Engineering, and Technology to break down the past, research display and plan another type of connected science in future. We give the best substance, an astounding representative affair, extraordinary systems administration openings with similarly energetic experts, and an incredible relationship to be in contact with eminent and new researchers and innovation to embrace trading of the thoughts and learning which encourage the coordinated effort between the researchers, academicians, and specialists of same field or interdisciplinary research.

Sciencezo Planet is capable in sorting out gatherings, classes, and workshops with the astute and flawless speakers all through the world furnishing you and your association with an expansive scope of systems administration chances to globalize your examination and make your own particular personality. Our gathering and workshops can be all around titled as 'sea of learning' where you can cruise your watercraft and pick the pearls, driving the route for imaginative research and systems enabling the quality by overpowering the intricacies related inside the particular fields.

SCIENTIFIC SESSIONS

Track 1: Coronavirus (COVID-19) Vaccine Research

Track 2: Vaccine Immunology and Immunotherapy

Track 3: Emerging and Re-Emerging Infectious Diseases

Track 4: Cancer Vaccines & Immunotherapy

Track 5: Immuno-Genetics & Immune Tolerance

Track 6: Immune-disorders, Allergy & Asthma and Human Vaccines

Track 7: Epidemiology and Parasitology

Track 8: Influenza and Respiratory Diseases

Track 9: Protein Based Vaccines

Track 10: Veterinary Vaccines, HIV/AIDS Vaccines and Hepatitis Vaccines

Track 11: Antibodies: Engineering & Therapeutics

Track 12: Vaccines Safety, Efficacy & Clinical Trails

Track 13: DNA Vaccines and RNA Vaccines

Track 14: Vaccines Pre-Clinical Validation to Clinical Trials

Track 15: Next-Generation Vaccine Delivery Technologies

Track 16: Novel Approaches & New Trends in Vaccines Development

Track 17: Vaccination Advancement and Immunization

Track 18: Vaccines Safety and Efficacy

Track 19: Vaccines for Pregnant Women & Neonates

Track 20: Ebola and Zika Viral Infections
