Infectious illness prevalence has recently increased, which the world must now accept. The Organization claims that via nationwide efforts, millions of lives might be saved and healthcare costs significantly decreased..

Singapore City, Singapore

6<sup>th</sup> Global Experts Meeting on

# Infectious Diseases

August 07-08, 2023 | Singapore City, Singapore

## Welcome Message

6<sup>th</sup> Global Expert Meeting Infectious Meet scheduled on **January 25-26, 2023** at **Singapore City, Singapore**. This conference is how anthropogenic environmental changes negatively affect human health by increasing the dangers of infectious diseases, natural disasters, food and water scarcity, as well as natural disasters and population migration. In the case of infectious diseases perceived as tropical, like malaria, socioeconomic variables may be substantially more crucial than climate. The effects of illness may also include a vicious cycle in which the diseases worsen poverty, which makes the poor more susceptible to illnesses.

The goal of INFECTIOUS MEET 2023

is to bring well-known academics, research scholars, and researchers together to exchange experiences, which will have an impact on every area of the conference. Additionally, it gives researchers, participants, and educators the ideal venue for attending and analyzing the most significant advancements.

## Market Analysis

Infectious illness prevalence has recently increased, which the world must now accept. They are by far the worst crimes in the world, causing more than 64% of all fatalities. The number of fatalities from infectious illnesses might increase by 18% in the upcoming years if nothing is done to reverse this trend. The Organization claims that via nationwide efforts, millions of lives might be saved and healthcare costs significantly decreased.

**“ Infectious Disease is an Era of Global Change”**

## Sessions/Tracks

- Scope of infectious diseases
- Epidemiology & Transmission
- Diseases caused by virus
- Infection and cancer
- Clinical Infectious Diseases
- Vaccines
- Infections with immunodeficiencies
- Tuberculosis
- Herpes simplex virus

## Organizing Committee

**Dr. John J.S. Cadwell**  
FiberCell Systems Inc. New Market  
USA

**Huang Wei Ling**  
Medical Acupuncture and Pain  
Management Clinic, Brazil

**Elsayed Ahmed Elnashar**  
Kaferel Sheikh University, Egypt

**KM Yacob Mathai**  
Marma Health Centre, INDIA

**Dr. Sonia Sayyedal hosseini**  
California Northstate University  
USA

**Dr. Seyed Saeid**  
California Northstate  
University, USA

## Supporting Journals

**Journal of Infectious Diseases & Therapy**

ISSN: 2332-0877 | Volume 10

**Journal of Immunological Techniques & Infectious Diseases**

ISSN: 2329-9541 | volume 12

**Medical Microbiology & Diagnosis**

ISSN: 2161-0703 | Volume 12

**Avail!**

CME & CPD Credits  
IOCM Certification
